

A VISIT TO PUSA INSTITUTE

With a vision to update our students of class XI& XII (medical stream), with the ongoing research in the field of Genetics, a visit to PUSA Institute was organized on 11th July,2019. The famed institute is spread over 500 hectares and is credited with many researches and genetically modified plant varieties. Dr.Bhatt, commenced the session with an inspirational speech and touched upon various approaches in the field of biology.

It being an era of life sciences & biology, the session proved to be highly motivating and the students were inspired to explore new ideas and discover many tools for the betterment of mankind.

Students got the golden opportunity to visit different laboratories and were exposed to the new technologies used in the present day research work. They also got to understand the demonstration of gel electrophoresis in the state of the art laboratories of the institute.

It indeed was an insightful day and the workshop infused the young minds to be original in ideas and innovative in approach.
