ADVISORY

Dear Students

As we prioritize your health and well-being, it is crucial to take proactive steps to prevent mosquito bites and protect from vector-borne diseases such as Dengue, Chikungunya, and Malaria. Here are some essential precautions you can take to stay safe:

- 1. Wear Fully Covered Uniforms:** Ensure you wear full-sleeved shirts and long pants as part of your school uniform to minimize skin exposure to mosquitoes.
- 2. Use Mosquito Repellents:** Apply mosquito repellent cream or spray on exposed skin and clothing to keep mosquitoes at bay.
- 3. Avoid Peak Activity Times:** Mosquitoes are most active at dawn and dusk. Try to stay indoors during these hours.
- 4. Prevent Water Collection:** Do not allow water to accumulate in and around your home or school premises to eliminate mosquito breeding sites.
- 5. Maintain Cleanliness:** Keep your surroundings clean.
- 6. Stay informed:** Stay updated on any health advisories in your area. Follow guidelines from the health authorities and School officials.

Your cooperation is essential in maintaining a healthy and safe environment for everyone.

Stay safe and healthy!

Regards

GDGPSD
