ADVISORY TO PREVENT THE SPREAD OF VECTOR-BORNE DISEASES

Dear Parents

Greetings!

In view of the **alarming rise in cases of vector-borne diseases such as Dengue and Malaria**, and with the objective of creating awareness and strengthening preventive measures, the school has implemented the following precautionary measures with immediate effect:

1. Students are advised to wear full-sleeved white school shirts to minimize exposure to mosquitoes.
2. Girls must wear black school stockings along with the school skirt.
3. The school undertakes regular fumigation and preventive measures across the school campus and school buses. As an additional precaution, students are also encouraged to use mosquito repellent before coming to school.

Parents are requested to ensure adherence to these preventive measures and extend their continued cooperation in safeguarding the health and well-being of our students.

Thank you for your understanding and cooperation.

Warm regards

Team GDGPS, Dwarka
